KYB's Online Training helps you and Your Customers

Yours for free from BESTBUY & KYB

Motorist/Driver Alert Video

This 4 minute customer waiting area video explains why ride control, shocks & struts are critical to the performance of Crash Avoidance Systems. It can help you show the motorist the value of maintaining the *designed performance* of the steering, suspension, brakes & tires.

* Available from BESTBUY upon request

Crash Avoidance Systems Training for Service Advisors & Technicians

Includes student guide and the KYB Vehicle Ride Control Systems Evaluation downloads. Finally, a proven way to road test and evaluate the condition and performance of ride control. Then, let the rating guide show the motorist when & why you are suggesting ride control replacements.

KYB Parts Pro Training

Product knowledge is critical to doing the job right and to earning satisfied customers. This video explains which products are the recommended OEM replacements to help restore designed performance & when to choose Monotube upgraded performance.
